

RENDERED COLLECTION

RENDERED BROADLOOM

RENDERED BARK

RENDERED LINES

RENDERED ROCK

RENDERED BROADLOOM

Inspired by the outer surface of trees, **Rendered Bark** is designed to show how altering a vertical surface texture can create an intriguing irregular linear pattern for the floor. **Rendered Lines** conceptually captures the flow of electrical current through all surface matter and illustrates the uneven, disjointed lines, caused by its movement. Lastly, **Rendered Rock** emerges from a redefining of cracked, eroding surfaces, and molten solutions all of which form a compelling organic surface. **Rendered Broadloom** provides the ultimate in small scale texture needed to round out this collection. Utilized to transition one tile pattern to another or as a single style choice for an entire space Rendered Broadloom is the perfect go everywhere texture.

Rendered Collection can actively impact or quietly accentuate any design environment much like a piece of art. Rendered tile is approved for all installation types, monolithic, quarter turn, random, brick, you name it. Encouraging creative installation of these products will best define flexibility for coordination and each styles unique personality.
