

STONE EFFECTS STONE MASTER WOOD MIX

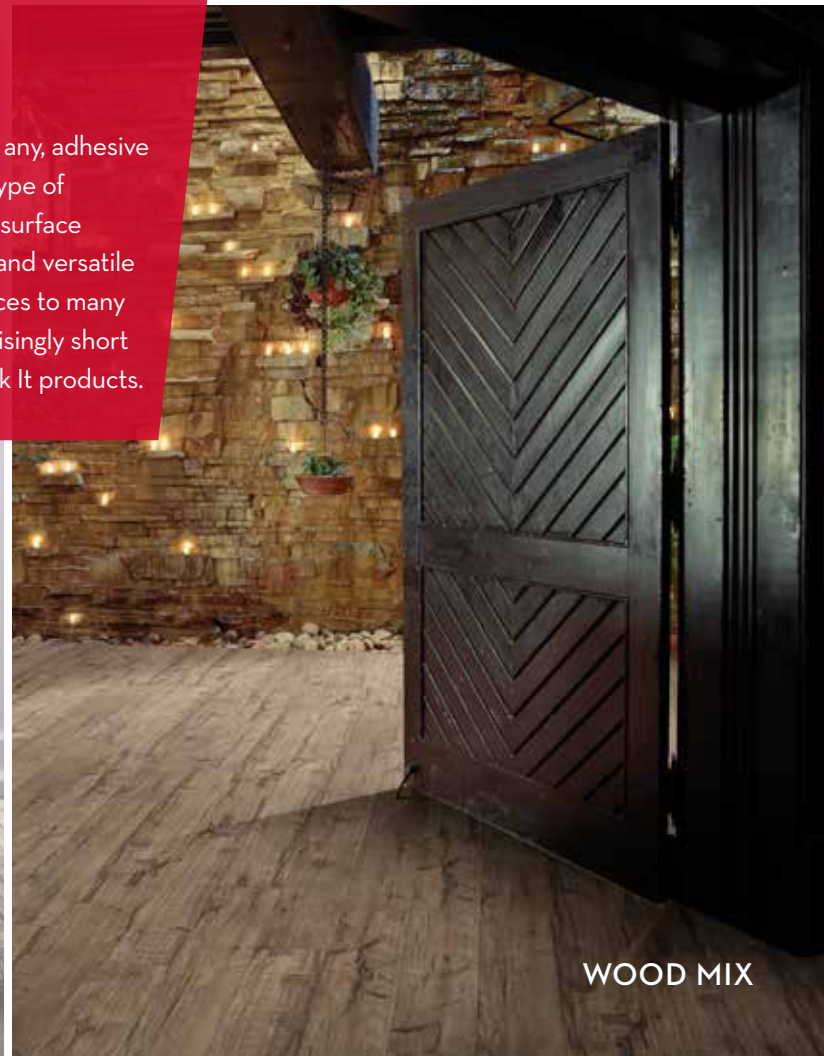

Lay It resilient products feature a unique design requiring little, if any, adhesive that can be installed quickly and easily in nearly any space. This type of resilient installs directly over the subfloor and most existing hard surface floors which minimizes floor prep. Lay It products feature stylish and versatile visuals and colors to refresh a wide array of areas from living spaces to many commercial renovation projects and other applications in a surprisingly short amount of time. For more resilient options see our Set It and Lock It products.
